

Your complete
SOLAR WATER HEATING SYSTEM

by Kingspan THERMOMAX

Benefits

- Provides up to 75% of your annual hot water demand - the 3rd largest component of a home's annual energy bill.
- Evacuated tube technology provides rapid conductivity and transfer of heat, 30% more effective than flat panel collectors.
- Kingspan Thermomax products are designed specifically to work in North American climates, even in cold, wet and humid conditions.
- Ideal for both domestic and commercial installations.
- 20 year warranty on evacuated tubes.
- Proven 25-year lifespan.
- SRCC approved.
- Certified to withstand hail impact test DIN EN12975-2:2006 using ice-balls.

This is a typical 20 tube collector for 1-3 people on a 35° south facing roof

Also suitable for commercial installations

The Complete Solar Package

A package for everyone

Kingspan Solar Inc. supplies packages to suit all homes and businesses and provides high performance hot water solutions for all geographical areas. Kingspan Thermomax solar thermal packages include everything you need for your installation of the world leading evacuated tube collectors.

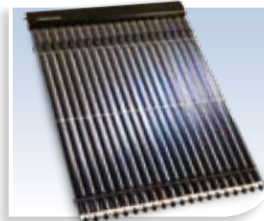

Stress free installation

We've chosen the best quality European manufactured components, which guarantee optimum performance of our premium quality collectors, thereby reducing time spent in system planning. Our plug-and-play collectors and easy-fit roof brackets mean installation is quicker and easier also.

Two most common packages for domestic installation
